About us

Urban Shopfitters was founded in July 2013 by Mark Pointer and Maria West. They have over 30 Years of experience working within the fit-out business whether that is on-site or in managing everything behind the scenes.

We are full members of NAS (National Associations of Shopfitters) and currently working with the organization to create a combined accreditation called SSIP which combines all the accreditations as one.

Over the past seven years, we have gained a proven track record of working in challenging environments including listed buildings, departure lounges at busy airports, major railway stations, shopping malls and occupied premises.

This means we are used to dealing with high security, conservationist and locations that are sensitive with delivery times and how materials can be delivered, while always bring projects in on time and within budge

As a business, we may only be a small team but we can handle any size job.

Testimonials

I have worked with the owner of Urban Shopfitters and his team at several different retailers for over 10 years. They have much value and organisation skills of work to be a long term asset/partner to myself at East and previous retailers I have Project Managed for. They have the knowledge and team members to pull off fit-outs at short notice, with very short time frame to completion and in budget. I wouldn't hesitate to recommend them for future work of large or small contracts.

Paul Hird
Property Manager

We have worked with Urban on both new store fit outs and refurbishment projects for a number of years and have always received a very high level of service. They always deliver an excellent shop fit on time and on budget. They have great experience working with some of the major rail companies and airports, whose RAMS processes can be complex and lengthy. Flexible, polite and always able to offer advice, we would be happy to recommend them to others

Head of Operations
Oliver Bonas

Chalk Architecture have worked closely with Urban Shopfitters for a number of Oliver Bonas projects in the last 3 years. They have always been professional and keen to go the extra mile for the work in question.

The team are approachable, thorough and work well to achieve high standards in the finished project.
